COVID-19 and respiratory testing

SA Pathology offers a range of collection options for patients seeking COVID-19 and full panel respiratory testing.

Self-collected PCR swabs for full panel respiratory testing provide a safe, fast and reliable way to diagnose respiratory viruses, including COVID-19. Self-collect respiratory kits are available to order from [Consumer Products](#).

Self-collected specimens must be accompanied by a GP request form. For a full list of drop off locations, visit our [self-collect respiratory testing page](#).

PCR swab collection for full panel respiratory testing, including COVID-19 is available at select collection centres in the metropolitan area and across regional South Australia.

Bookings preferred. To view a full list of sites and to book online, visit our [Coronavirus information page](#).

To ensure the health and safety of all persons accessing our services, SA Pathology maintains strict infection control measures which includes the wearing of masks while in our collection centres.

COVID-19 only testing is available without a GP referral at our dedicated sites. For a full listing of dedicated COVID-19 testing sites, visit our [Coronavirus information page](#).

COVID-19 results are sent direct to the patient or nominated contact via a text message. All respiratory test results are sent to the requesting doctor.

Regards
